| <b>sea-level pressure</b>      | 1014.9mbs/ 29.97inHg |                  | 1013mbs      |                            |

**REMARKS:** climatological normal rainfall - 30-year average (1982-2011) and temperature - 21-year average (1990-2010)

A strong Atlantic High-Pressure Systems resulted in windy conditions, rough seas and increased rainfall amounts during the first half of the month. Rainfall recorded during that period resulted in above normal rainfall total. Dry days were recorded throughout the latter half of the month. Warmer than normal temperatures were recorded.
